

NOOS annual report 2015

Member report - FCOO

September 2015

Country	Denmark					
Institution	Defence Center for Operational Oceanography					
Modelling Status and new initiatives	<p>Status: Operational barotropic 2D model covering the Northern North Atlantic. To generate open boundary conditions to baroclinic model. Operational: baroclinic 3-dimensional model covering North Sea – Baltic Sea region</p> <ul style="list-style-type: none"> • GETM code One way nested (1nm. and 1/3 nm.). 60 vertical layers, general vertical coordinates 4x daily 56 hour <p>Wave model Wave Watch III</p> <ul style="list-style-type: none"> • Three one way nested models, with focus on the inner Danish waters. The horizontal resolution for the North Atlantic model, North Sea – Baltic Sea, and the Inner Danish water models are 9nm, 3nm and 1 nm, respectively. 56 hour forecasts 4 times a day <p>Seatrack Web:</p> <ul style="list-style-type: none"> • Oil dispersion model for the Danish Waters and Baltic Sea <p>Under development:</p> <ul style="list-style-type: none"> • Sea ice module for the operational model (GETM) in the North Sea – Baltic Sea region • Oil drift system SeaTrackWeb web is being setup for Greenland waters • Operational model (WW3) for the Arctic Ocean and Northern North Atlantic including the Greenland Waters 					
Dissemination Status and new initiatives	<p>Status: Internet service (public): Real-time observations and forecasts available at IFM Maps (ifm.fcoo.dk)</p> <table border="1"> <thead> <tr> <th>Observations (Source: Danish Meteorol. Inst.)</th> <th>Forecasts</th> </tr> </thead> <tbody> <tr> <td> <ul style="list-style-type: none"> • Sea level </td> <td> <ul style="list-style-type: none"> • Sea level • Sea temperature • Salinity • Near-surface currents • Wave height (significant) • Wave direction (main) • Wave height (significant, External src: ECMWF) • Wave direction (main, External src: ECMWF) • Wind (External source: ECMWF) </td> </tr> </tbody> </table> <p>Ftp box services:</p> <ul style="list-style-type: none"> • Sea level forecast at selected stations. The NOOS project e-surge • Cross section transports. To MyOcean2 project: MME • 2D fields of salinity, temperature and currents (0-5m average). To MME project 		Observations (Source: Danish Meteorol. Inst.)	Forecasts	<ul style="list-style-type: none"> • Sea level 	<ul style="list-style-type: none"> • Sea level • Sea temperature • Salinity • Near-surface currents • Wave height (significant) • Wave direction (main) • Wave height (significant, External src: ECMWF) • Wave direction (main, External src: ECMWF) • Wind (External source: ECMWF)
Observations (Source: Danish Meteorol. Inst.)	Forecasts					
<ul style="list-style-type: none"> • Sea level 	<ul style="list-style-type: none"> • Sea level • Sea temperature • Salinity • Near-surface currents • Wave height (significant) • Wave direction (main) • Wave height (significant, External src: ECMWF) • Wave direction (main, External src: ECMWF) • Wind (External source: ECMWF) 					
Relevant international projects	<p><i>eSurge project</i> <i>Multi-Model-Ensemble (MME) project</i></p>
